

# 2049 ATLANTIC LED LOW PROFILE

Small but formidable LED lighting fixtures built in the US, designed for rugged service. Designed and built to compete with any fixture of comparable size, light output, and power consumption. Two separate models operate on 12-30 volts dc or 120-240 volts AC. Fixtures come complete with a 12" wire lead thru a cord grip for each voltage. Different lead lengths available upon request, and four exposed mounting holes make for hassle-free mounting.
