Energy Saving PAGODA LIGHTS

Energy efficient light fixtures, retrofits and custom design fixtures

3-TIER OR 4-TIER PAGODAS

Our 3-tier and 4-tier pagoda lights utilize polypropylene housing, STAINLESS STEEL draw bolts and hardware (no steel draw bolts to rust in the housing making it impossible to change lamps!) This fixture provides even inexpensive illumination for gardens, pathways, planting bed accentuation and more. The included LED light source maximizes efficiency and lamp life making this option both economically and ecologically superior
GO GREEN!

Component features and specifications

- Dimensions: 3-tier 8" x 6 1/2" O.D.
- Dimensions: 4-tier 10 1/4" x 6 1/2" O.D.
- Construction: Polypropylene Housing
 - Clear Polycarbonate lens
 - Stainless Steel Screws
- Colors: Dark forest green or Black
- Power Consumption: 9.5 watts
- LED: 1000 lumens
- Mounting: 1/2" Female pipe
